

Summer 2007 Update

The Department is continuing to work on the OSC rules. During this process, the Department identified several regulatory and statutory issues that must be resolved before the rulemaking can proceed. The Department will continue with the rulemaking and a draft will be posted on this website when the regulatory and statutory issues are resolved.

The timeline for this rulemaking has been removed. An updated timeline will be posted on this webpage when a draft is ready for public comment. Please continue to check this webpage for more information.
